Futural is solid aluminium cladding panel that is A1 non-combustible to BS EN 13501-1 and suitable for any types of buildings with any height. Made from 5000 marine grade aluminium and PVDF coatings, it is highly durable and impact resistant, yet available in unlimited colour range. The superior PVDF architectural coating of Futural offers excellent UV stability and coil coated colour retention.

Futural has been tested to be compliant with below demanding standards, proving its high durability and optimum resistance to weather and industrial pollution.

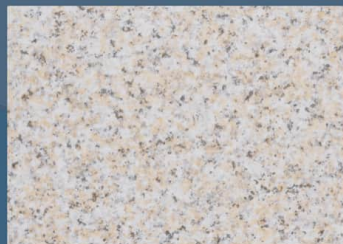

- 4000 hours salt spray accelerated weathering test
- 4000 hours humidity accelerated weathering test
- 2000 hours UV exposure accelerated weathering test
- 1000 hours acetic spray accelerated weathering test
- AAMA2605 coating test
- EN1396 coating test
