AluNatur

Comparable to the natural aesthetic of wood, stone and marble, our AluNatur range shows the beauty of aluminum. Its unique coating system is built up from a (semi-) transparent topcoat in combination with a colorless pre-treatment. The primerless system shows up the natural metal aesthetics of the substrate below. An almost unlimited range of (semi-) transparent clearcoats creates an exceptional color palette.

The transparent nature of the paint implies that regularly appearing minor substrate- and process variations are now openly revealed. These aesthetic variations are often of minor importance for the total appearance. Actually, architects and building owners often prefer a natural surface appearance where slight color nuances and surface variations are visible. Only by means of intensive checks and controls we can guarantee a refined uniform surface. This is the reason that we offer our AluNatur range in two grades:

Living Grade: A natural surface appearance where color nuances and surface variations may be visible.

Fine Grade: A uniform surface appearance (observed from 5 meter distance).

Guidelines

- Order projects in one batch to minimize color differences
- Protective film recommended to avoid installation scratches
- End use strictly ≥ 1.500 meters from coastal areas
- No end use in heavy industrial- / corrosive environments
- Limited end use between 30° Northern Latitude and 30° Southern Latitude
- Minimum order quantities apply; contact us for orders < 6.5 Mt
- Maximum order quantity in Fine Grade quality is 24 Mt
- Bare material may vary in color / show up small irregularities
- Color samples based on 3005 alloy
- Final coated product can slightly vary from sample
- Final leadtime confirmation for Fine Grade is only possible after coil acceptance in Euramax (non acceptance may imply an 11 – 12 wk delay)
- Request our datasheet for more detailed product information

Neutelings Riedijk Architecten
AluNatur HDP Bright BRUSHED
Aluminium Composite Panels

AluNatur Living Grade

- Living color nuance variation
- Natural metal substrate variation
- Few number of surface deviations

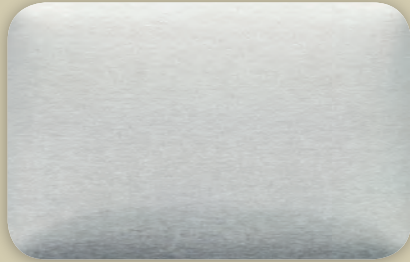

AluNatur Fine Grade

- Limited color nuance variation
- Uniform metal substrate aesthetics
- Minimum number of surface deviations

Specifications

- Aluminum thickness: 0.3mm - 1.5mm
- Coil width: up to 1.600mm
- Minimum Order Quantity: 6.5 Mt
(on request smaller volumes may be possible)
- Gloss Range: Matte (10 Gloss Units) - High Gloss (90 G.U.)
- Warranty indications are maximum warranty periods
- Other colours available on www.euramax.eu

EuramaxLab

The architectural specification team of Euramax is called EuramaxLab. We support architects in specifying coated surfaces and integrate our coating experience with the knowledge of our partners fabricating cladding panels. EuramaxLab strives to provide architects with a world of choice in metal envelope design.

EuramaxLab support services

- Custom coating development
- Custom color development
- Precision color matching
- Specification support
- Metal sampling
- Mock up service
- Network of panel manufacturers
