Architectural products

Accelerating performance
in metal envelopes

EURAMAX

Architectural products

Euramax is a premium coil coating specialist

Our pre-coated metals color all kind of applications, from façade cladding of airports, train stations and stadiums to roofing and ceilings of commercial buildings and apartment blocks.

Accelerating Performance in Metal Envelopes

Our surfaces are widely used by premium panel and profile manufacturers as the visible side of their product. They perform as both long term protection against environmental influences as well as aesthetic solutions that make buildings stand out. The coated reverse side of our metal is also important. High quality pre-treatment and primer application have a great influence on the functional properties of panels.

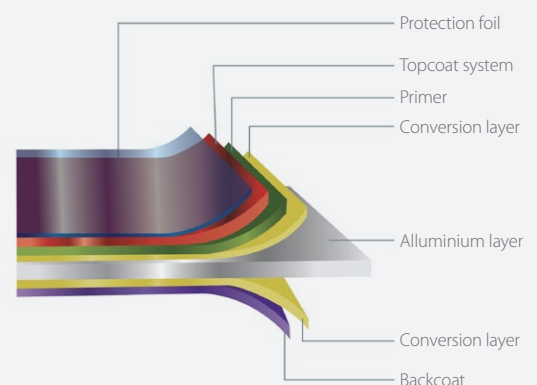

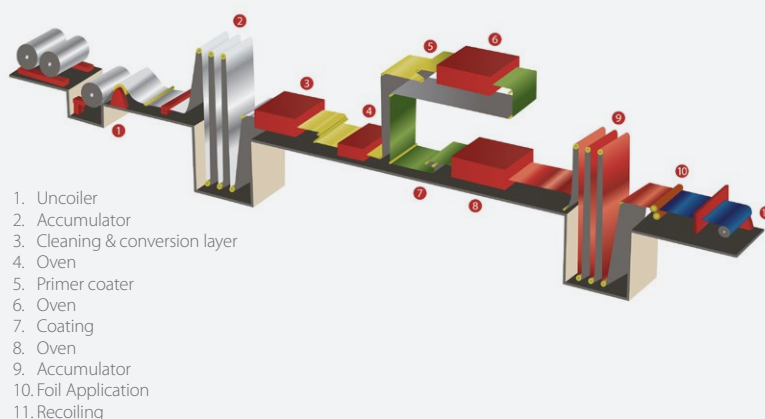

Identity

- Coating factories in The Netherlands and the UK
- Sales offices in the Middle East and China
- ISO 9001 & 14001 certification
- Production according to ECCA and EN standards
- Wide range of aesthetic specialties
- Specialist in custom coating specifications for top architectural projects
- ECCA Premium certification
- Sustainable technology
- 100% recyclable products

Program

- Premium technical- and aesthetic coated metal coil for roof and façade panels
- Available in coil, slit coil and sheets
- All aluminium alloys and tempers (steel on request)
- Width from 35 mm - 2.630 mm
- Thickness from 0.3 mm - 2.00 mm
- Coating types PVDF/FEVE/HDP/PUR-PA up to 4 layers
- Reverse side coating possible
- All colors and glosses (RAL, NCS, BS and Pantone)

Coil coating or pre-painting is the process of coating metal coils in a continuous and highly automated process, prior to final fabrication steps. Advantages of coil coating are superior quality, a uniform paint layer and consistent colors. Next to this, cleaning, pre-treatment and paint application are optimal in our coil coating facilities, leading to an unquestionable advantage in panel durability and sustainability. An estimated 90% of roof and façade panels are coated using the coil coating process.

Coating type

The most important characteristics of coatings are defined by the resin or coating type. We supply a wide range of coating types in up to four layers. The right choice of coating depends mainly on the environment of the project. However, some aesthetic specialties like dual tone-, transparent and textured finishes are only available in specific coating types.

EuraFlon

EuraBuild
Performance

BioMax

The ECCA Premium label, awarded by the European Coil Coating Association, ensures the quality, sustainability and aesthetics of pre-painted products and building applications. Euramax manufactures ECCA Premium certified coatings.

Color ranges

Solid and metallic colors are the standard paint finishes in the market, but many more aesthetics are possible. We offer a wide range of specialties, from transparent to dual-tones and from mirror to structured surfaces. You can find more details in the individual brochures.

ACCELERATING PERFORMANCE IN METAL ENVELOPES

EuramaxLab

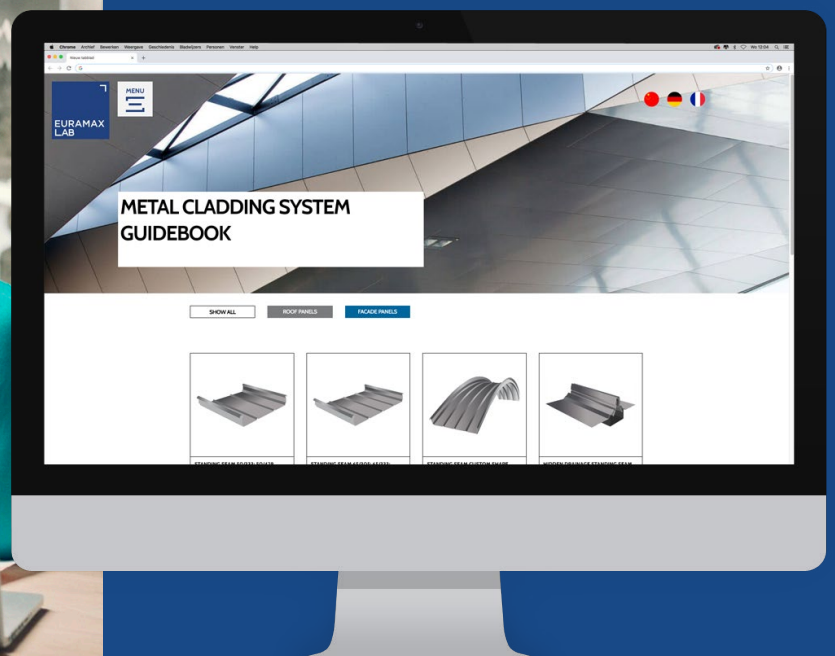

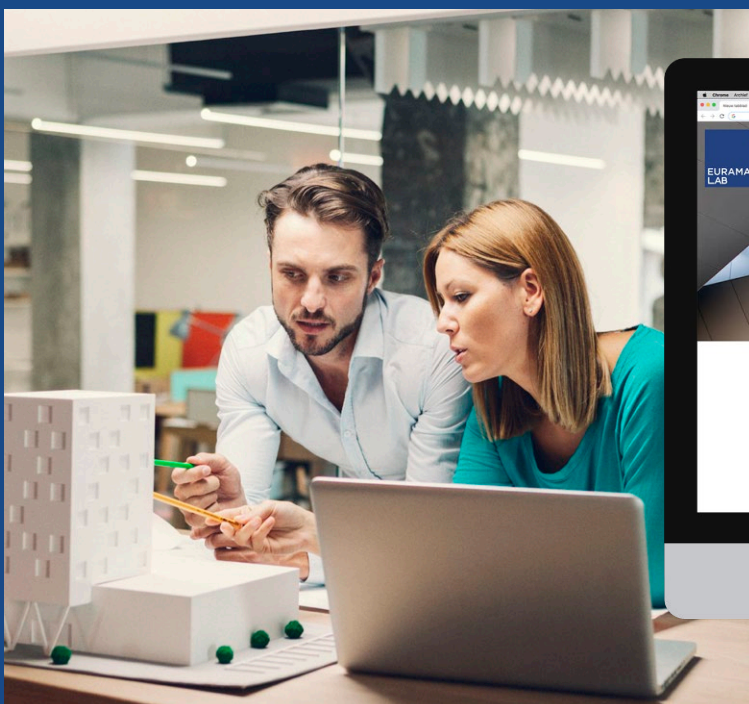

The architectural specification team of Euramax is called EuramaxLab. We support architects in specifying coated surfaces and integrate our coating experience with the knowledge of our partners fabricating cladding panels. EuramaxLab provides architects with a world of choice in metal envelope design.

It does make a difference

Whether you design a primary school in Germany, a theater in Shenzhen or an airport in the Middle East makes a big difference for your coating choice. Our “standard” ranges and paint build-up offer outstanding solutions for the first. The optimum solution when developing very large projects in rough environments is more difficult.

Custom performance specifications

Large building projects in heavy duty areas require high quality solutions and an excellent price economy. We support in finding the optimum solution in aspects like coating build-up, finding outstanding local partners and delivering service tools that help you stand out. This may lead to custom coating specifications and colors, sometimes with an ultra durable finish layer, in other circumstances an anti-graffiti layer can be applied. Special solutions for projects in special environments.

SERVICES

Custom coating development

When standard products are just not good enough, we support custom performance specifications.

Specification support

Intelligent products explained in simple descriptions. We support in writing specification texts.

Quick sampling service

Metal chip sampling can be requested and delivered swiftly anywhere in Europe. We have many colors in stock; these can be at your desk in days.

Precision color matching

Accurate color matching service to meet your design criteria in only 8 days.

Contact us

+31(0)475 370 341 | max@euramax.eu | www.euramax.eu

Custom color development

Aesthetic new color development is possible (min. order quantities apply). Lead time between 2-8 weeks.

Mock up service

We try hard to make material available to build mock ups to present your ideas in real life.

Network of panel manufacturers

We know the right people at the right companies to support your project development.

Personal assistance

Advice and inspiration on hand, just call +31475370341
